

A CRYPTO CRIME CRYPTO THEFT

PAST

2009-PRESENT

As cryptocurrencies rose in value, so did the motivation to steal them. Attackers have targeted individuals, organizations, and exchanges in an attempt to steal digital assets.

PRESENT

2018

Crypto Theft Has Evolved In The Following Ways:

- Attackers have been stealing mining hardware
- Cryptocurrency exchanges are being targeted for their vast sums of digital assets
- People with high value digital assets are being targeted, attacked, or even taken hostage for their assets
- Criminals are using malware to re-route cryptocurrency transactions

FUTURE

2018+

Crypto Theft Predictions For The Future:

- Attackers will have more motivation to steal digital assets as they rise in value and become more widely adopted
- Exchanges will continue to be targeted in high-risk, high-reward operations
- Physical attacks and digital attacks will continue to evolve and become more effective

VULNERABILITIES

- Keeping your digital assets online
- Storing your keys and wallet in the same location
- Sharing information about your digital assets with others

MITIGATION

- Store your digital assets offline
- Separate your keys and your wallet
- Keep private the information about your digital assets, such as the coin(s) you possess, the type of wallet you use, and the value of your assets
- Separate functions of finance from digital asset storage at your organization
- Use devices with an anti-malware solution
